2/ Call/Programme

COMENIUS Multilateral school partnerships

Title: Feel European, you are European

3/ Timetable (deadline...):

21 February

4/ General description of the project:

To increase the feeling of European citizenship, not only among young people but also throughout the Educational Communities, we must know the culture, social reality and educational systems of each country, breaking down stereotypes and prejudices that may exist, to generate bonds among all of us. It is essential to promote personal and effective relationships among participants so that it is not just an idea but a reality.

We have selected an interdisciplinary project which allows us a work from all subjects, what favours the implication of all teachers being actually a school project. It will be worked at two levels, at every school and among the different ones, with individual and common works:

5/ Main objectives:

- Increase the feeling of European Citizen.
- Break down topics, stereotypes and prejudices.
- Motivation for learning and learning-to-learn skills;
- Motivate towards the learning of other languages.
- Key competences: improving language learning; greater literacy; making science more attractive; supporting entrepreneurship; and reinforcing creativity and innovation;
- Foster the use of new technologies.
- Improve the teaching practice.

6/ Main activities:

We will work at two levels, at every school and among the different ones, with individual and common works:

At every school:

Each teacher working on the project will choose one or several classes of students to take part in the activity. From their subjects and specified in their syllabus, relevant aspects of the project will be dealt to produce a final product.

All schools together:

A web site about the project will be made to show all individual and common works, programs of meetings and evaluations of the development of our aims and spread our researches.

A logo for the project will be chosen, there will be a contest divided into two stages (internal and general). The voting process will be via the website.

We will make a forum about the project to discuss current events.

A school diary will be made every year in every language participating in the project.

Specific aspects like social integration, equal opportunities, human rights, healthy habits, preservation of the environment and natural resources, and professional opportunities in the EU will be worked with surveys, posters, photographs or Power Point presentations.

A DVD compiling all the projects will be made at the end of the project.

Our work will help us to improve the use of foreign languages and ITC, to develop social and personal abilities and make friends by breaking borders.
